

SUMMER BRIDGE PROGRAM IN MATHEMATICS

For students entering grades 1-6

LIVE-ONLINE BEGINNING IN JUNE 2021

Known as the “summer setback” or “summer slide,” the two-plus month loss of knowledge that students experience when they are not utilizing their newly acquired skills can have a significant impact on their performance in the upcoming school year. Presented as a “visit to the teacher’s desk,” the Summer Bridge Program in Mathematics helps minimize students’ loss of proficiency by providing them with an instructor-led environment for reviewing and practicing skills learned over the previous year as well as receiving guided instruction on topics to be covered in the grade they are entering.

- **Numerous six-week and three-week options**
- **Interactive classes**
- **Access to prerecorded versions of each session**

Each class is appropriate for students who recently completed that grade and want to minimize summer losses or for those who are preparing for that grade and want an introduction to the topics they will be presented with in the coming year.

GRADE 1

- Basic arithmetic
- Time
- Measurement basics
- Introduction to graphs
- Basic geometry
- Fractions

GRADE 2

- Basic arithmetic
- Time
- Measurement
- Graphs and data representation
- Geometry
- Fractions

GRADE 3

- Basic arithmetic
- Foundations of algebra
- Time
- Measurement
- Graphs and data representation
- Geometry
- Fractions

GRADE 4

- Arithmetic
- Foundations of algebra
- Measurement
- Graphs and data representation
- Geometry
- Fractions

GRADE 5

- Arithmetic
- Foundations of algebra
- Word problems
- Measurement
- Graphs and data representation
- Geometry
- Graphing points and lines
